Escaped Death In Wreck Judith Jones Mahoney Going Home With Baby

Mrs. Harry L. Mahoney, the daughter of Rev. and Mrs. Ellis E. Jones of Vernon, formerly of East Northfield, had been visiting at the home of her parents with her child for several weeks. She had greeted many former friends while here but the time had come for her to return to her husband and home at Cuyahoga Falls, Ohio. With Mr. and Mrs. Jones she was motored to Greenfield and put safely aboard a Pullman of the "minute-man" of the Boston & Maine railroad last Friday evening. Early Saturday morning a telegram dispatched from Utica reached Mr. Jones signed Judith, said they were "safe." Then from her husband came a telephone call with several others following. The situation was only revealed as the hours passed. The Pullman had been attached to the Lake Shore limited, which had been wrecked in the terrible rail disaster at Little Falls, N. Y. Mrs. Mahoney and child were in the last Pullman second car from the end of the train, and the last five Pullmans escaped the severe destruction which the preceding cars received and where death resulted to so many. Detailed information reveals that Mrs. Mahoney and child were in their berth but awake. They were jostled and suffered minor bruises and after waiting for about three hours were escorted and carried to the relief train and taken to Utica where every kind consideration was shown them. Later they were placed aboard a regular train and proceeded to their destination. Sundays papers listed her as uninjured among those who were rescued and gone on to their homes. For husband, father and mother as well as her brother, there were many anxious hours on Saturday and Sunday until the tension was relieved of Mrs. Mahoney's safe arrival at her home. For the time being to avoid publicity, Mr. and Mrs. Mahoney have closed their home and are at his parents home while she and the child may have a needed rest and quiet. Every kindness and consideration was shown by officials and workers to those saved in the wreck and Mrs. Mahoney is full of appreciation for the assistance given, although she will never forget the realization of how terrible a train wreck can be and of the fearful scenes she witnessed as she was removed.

Winter Back In Force Snow Makes Fairlyland

Two weeks ago a light fall of snow with cool weather, brought, many thought, the final spell of winter weather. Winter has been prolonged this year, even into the lap of spring, and to most of the natives, there is a weariness and exhaustion of cold, snow, ice and gale. However last Sunday morning brought a real blizzard, the winds blew and some three inches of heavy snow fell, covering the earth and bringing down the limbs of trees in its weight. The rain fell and the brooks became rushing torrents, while the water in the river rose to threatening peaks. However by Tuesday, the temperature rose slowly, the water receded and summer is expected, just around the corner.

Fire At Dean Williams

The fire department was called to West Northfield Wednesday evening to the home of Dean Williams shortly after 7:30 o'clock. Mr. Williams had been burning grass near the south side of the house and had entered the house for supper when the family smelled smoke. Hurrying outside, Mr. Williams found the south foundation of the building ablaze. Meanwhile, Mrs. Williams aroused the two children who had gone to bed and neighbors hastened to assist in the removal of furniture and household effects.

The blaze gutted the first-floor living room, a second-floor bedroom and burned a large hole in the roof. Most of the furniture was saved, but the entire interior of the house was damaged badly by fire and water.

The property is owned by Mrs. H. V. Martineau. Estimated damage to the house is \$1200. The firemen worked hard for about an hour to subdue the flames, but in the meanwhile the transmission on the fire truck had cracked up and a hurry call was sent for the forest fire truck with its booster pump. Repairs to the fire truck will be made immediately. Mr. Williams and his family will make their home with his parents on Warwick Ave.

The annual meeting of the Women's Missionary society of the Congregational church will be held at the home of Mrs. Lawrence Lazelle on Wednesday afternoon, May 1st at 2:30 o'clock. Members only.

easiest of all gearshifts to operate...

80% Automatic—Only 20% Driver Effort!

Because

ITS ACTION IS EASIEST!

Tests prove Chevrolet's to be the easiest steering column gearshift to operate. Compared with the two cars next in sales, Chevrolet requires only 2.8 ft.-lb. effort, Car B 8.5, Car C 14.8.

Because

ITS LEVER AND ITS "THROW" ARE SHORTER

Chevrolet's lever and its travel or "throw" are the shortest, and that means the quickest shift. Length of Throw: Chevrolet, 4½"; Car B, 7½"; Car C, 10½".

Because

IT'S EFFORTLESS IN TRAFFIC

Stop and Go—Red and Green—Halt! Start! That's traffic. And that's where Chevrolet's easy shifting is appreciated. Vacuum does 80% of the work; only 20% is done by the driver. No tugging, no shoving!

EDITORIAL

The summer will soon be here, despite the fact that spring, has been showing an ungainly face. The weather has brought to us frayed nerves and colds and almost ruin to our dispositions. Mere existence has been a loadstone and according to the degree of our poverty a struggle for survival. Summer can bring to all a change in living and a brighter outlook for it will afford a real change, a real vacation without the necessity of actual travel. The season has been monotonous as we have held our faces down. The versifier has well said:

If your nose is close to the grindstone rough,
And you hold it down there long enough;
In time you'll say there's no such thing
As brooks that babble and birds that sing.
These three will all your world compose;
Just you, the stone and your darned old nose.

So here is hoping for summer soon, a vacation change for all.

The Back Yard Gardener

By G. O. Oleson

All indications to the contrary, I still think that spring is on its way, and so I'm going ahead making plans for window boxes. I've got to start from scratch because my old ones have gone the way of all things over-worked.

When it comes to window boxes the most common type of material is wood. Redwood, cypress, and

cedar are probably the best woods, although pine, hemlock, or larch make very fine boxes and resist decay. But don't let the type of wood prevent you from making a window box, for after all a packing box from the store can be used, and the flowers will never know the difference.

It's always well to provide a little drainage. In wooden boxes that can be done by simply boring small holes through the bottom.

Have your box at least 10 inches deep (that means 8 inches of soil), about 8 or 10 inches wide, and the length about 2 inches shorter than the width of the window. If your window box is on the windy side of the house, it might be well to make it even 12 inches deep. This will give your plants a little more protection and a little more chance to withstand the wind.

It's all right to paint the inside of the window box before you fill it with soil provided you let it dry a few days. Another way of preventing the inside of the box from decaying is to char it. Simply spray the inside with kerosene, light it, let it burn just a bit until the box is well charred, and then turn it inside down and smother the fire. This reduces rotting or decay.

For soil in your window box the experts suggest this combination: 2 parts of garden loam, 1 part of well rotted leaf mold or compost, 1 part of sand, and if at all possible 1 part of well rotted barnyard manure, and about 1/2 part of bone meal. If you can't mix it at home, get it from your florist. It will pay you big dividends because plants in a window box are pretty well crowded and hence your soil should be plenty rich. And it's a good idea to add some fertilizer during the growing season. This will give your plants plenty of oomph.

Now if you want to be like the Jones' plant periwinkles, geraniums, and ivy. But in my estimation there is nothing much better than the balcony type of petunias available in white, pinks, lavender,

purples, reds, and combinations of these. Phlox drummondii in other words, the dwarf phlox—dwarf giant-flowering snapdragons, California poppies, all make excellent and a little bit out of the ordinary garden box flowers.

A good combination would be blue lobelia, pink verbena, and asparagus fern. Oh, you can find any number of combinations that will make your window box different from your neighbors'. Tuberosus-rooted begonias, heliotrope and nasturtiums are others.

Of course, you will want some plants which will take a nose-dive for you—in other words, hang over the edge of the box. And here it's well to stick to the standard English ivy, variegated periwinkle, or green and white leaved vine. Morning glories going up the side of the window will give you something special.

Then if you really want to be fancy and if you have a house which will take this type of a window box, try raising some boxwood or similar shrubbery in your window box and clip it into some definite shapes. Dogs, cats, teddy bears, many things might be used as models for such a window box.

Incidentally, if I haven't given you enough in the way of suggestions in this little write up, you might write to the State College at Amherst. They have a special circular No. 51 on Window Boxes. It's a mighty helpful little publication and a copy is free to Massachusetts residents.

NATURE IS STARTING Fresh

Trees are putting out new leaves,
birds are building nests—everything's
making a fresh start. What about
YOU? About certain friends
you've neglected all winter? Certain
visits you promised to make last summer?
It's so easy to get good things
started—by telephone. It costs little
to call out of town—even less evenings
after 7 and all day Sunday.
